

## SUMMARY

**AI engineer** with **10+ years** of fullstack and backend experience — now shipping **LLM-powered features** (RAG, agents, evals) in Python on top of a long career in enterprise **Java, Spring Boot, Angular, and cloud** platforms at T-Mobile scale. Comfortable owning features end-to-end: API design, async flows, observability, and production reliability.

## EXPERIENCE

### Cloud Consultant · Concentrix

Aug 2023 — Present · Hyderabad

Client: **T-Mobile US** — Supply Chain Management (SCM)

- Owned services in **T-Mobile SCM** — the platform managing end-to-end digital retail inventory, reverse logistics, and Device Logistics Management (DLM).
- Built and enhanced **TIMO Console** and the **TIMO iOS App** for inventory movement, reverse flows, and logistics tracking across the retail network.
- Designed cloud-native microservices with **Spring Boot** and REST APIs; integrated async flows via **Kafka** and **RabbitMQ**; containerized with Docker + Kubernetes.
- Set up CI/CD on **GitHub Actions** and **Azure DevOps**; parallel track building AI side projects with LangChain / RAG / Agents in Python.

STACK Java 17 · Spring Boot · Microservices · Angular 16 · AWS · Kubernetes · Kafka

### Senior Software Engineer · Concentrix Catalyst

Jul 2019 — Aug 2023 · Hyderabad

Clients: **T-Mobile US** · **Union Pacific Railroad**

- Delivered **Crew Allocation & Time Management** for UPRR — designed Rest Day functionality and integrated the calculation end-to-end into the CREW module.
- Owned 3 SCM modules (**DRI / DRO / DLM**) at T-Mobile — kept them fast, bug-free, and healthy at production scale.
- Integrated **Kafka** for async, high-volume data-load scenarios; tuned **Cassandra** for measurable latency wins on hot endpoints.
- Led requirement analysis and root-cause investigation for production issues; mentored newer engineers on Spring / Kafka patterns.

STACK Spring Boot · Apigee · Cassandra · Kubernetes · Splunk · Angular 8 · Kafka

### Software Engineer · Tata Consultancy Services

Feb 2016 — Jul 2019 · Mumbai

Client: **CCIL** — Clearing Corporation of India Ltd.

- Worked on CCIL — guaranteed clearing & settlement for Money, G-Secs, Foreign Exchange, and Derivative markets.
- Shipped **ERCS** (Electronic Receipt & Confirmation System) for collateral notices — live at *enotice.ccilindia.com*.
- Built **CRM** (Credit Risk Monitoring) — ingested member Excel data, calculated risk, categorised participants, and set limits automatically.

STACK Spring · REST · Oracle · Tomcat · AngularJS · JSP · JPA · Git

| **SELECTED PROJECTS**

---

**DocuMind** • RAG-powered doc assistant

Retrieval-augmented Q&A over technical docs. Chunking → OpenAI embeddings → ChromaDB hybrid search + reranking → GPT-4 answers with cited sources via FastAPI.

Python • LangChain • OpenAI • ChromaDB • FastAPI

**AgentFlow** • Multi-agent workflow

LangGraph-based orchestration — planner / retriever / executor / critic agents sharing state with tool calling, function routing, and self-correction loops. Used to triage GitHub issues.

Python • LangGraph • LangChain • OpenAI • Function Calling

**LocalMind** • Self-hosted LLM chat

Privacy-first chat running entirely on local hardware. Llama 3 via Ollama, custom RAG over personal notes with sentence-transformers + ChromaDB, streaming via FastAPI + Next.js.

Ollama • Llama 3 • Python • FastAPI • ChromaDB • Next.js

**T-Mobile SCM Platform** • Cloud-native supply chain

Ownership of DRI / DRO / DLM modules — Kafka async flows, Cassandra-tuned hot paths, Kubernetes orchestration; ongoing TIMO Console + iOS App enhancements.

Spring Boot • Java 17 • Apigee • Cassandra • Kafka • Kubernetes
